

Onlinelabels.com sells miniature labels that work very well for designating ATB's for student, class or school run charts.

The item number is OL2050WX

The order is for 250 label sheets, each with 221 labels per sheet. That's 55,250 all together. A lot of celebration! The directions for printing with Adobe Reader. Instructions are at <https://www.onlinelabels.com/instructions/OL2050WX>

I have used these successfully with the LtoJ® logo. Obviously, a school can print school logos on these labels also. It would be easy to have different labels for student, class and school run charts.
