

How to Derail Education's Pain Train and Climb the Hope Slopes

The Jenkins curve needs to be framed in the Education Hall of Fame. It is powerful, scary and actionable.

– John Hattie, author *Visible Learning*

Education's Pain Train was renamed "The Jenkins Curve" by John Hattie. He writes further, "Schools MUST be inviting places for students to come and learn. *How to Create a Perfect School* details the interventions, the research, and the inspirations to dramatically push this curve upward."

Lee's keynotes and workshops have 3 parts: (1) The Pain Train, (2) The habits inherited by today's educators causing the Pain Train, and (3) the steps necessary to replace the Pain Train with multiple Hope Slopes.

Example Hope Slopes All Show Learning Growth for Whole School Year

"Jenkins first sets the stage by showing that continuous improvement is not a matter of attitude, but rather one of strategy."

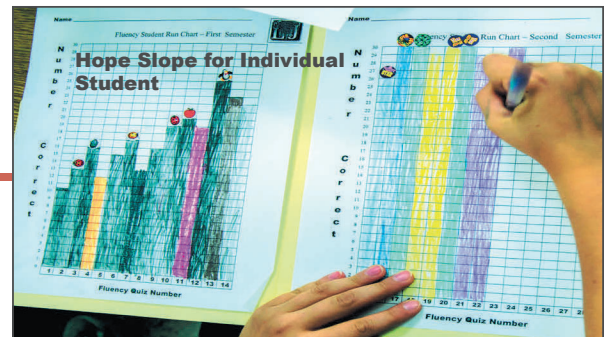

– Michael Fullan

"I love visiting classrooms to observe the evidence of Lee Jenkins' work. The evidence of student progress is visible on charts and everyone's faces."

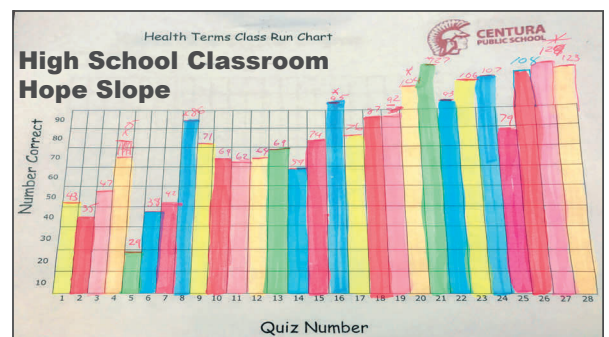

–Julie Otero

"What Lee Jenkins has visualized for education is a vibrant improvement for all students at all grade levels. Lee has the solutions you want for your community."

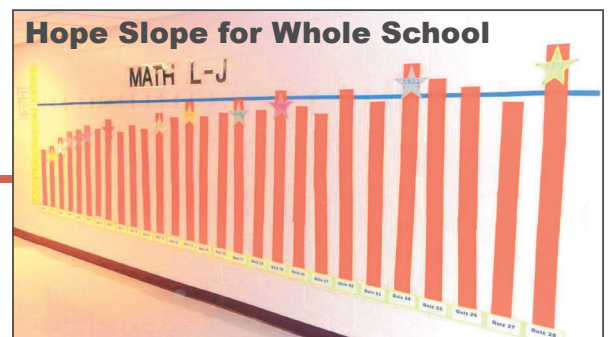

— Jack Canfield, author of *The Success Principles™* and co-author of the *Chicken Soup for the Soul®* series
